Research pipeline

Communication in Times of War and Political Turmoil.

With Wook Sohn and Vira Vyshnevska. Examines how the clarity and information content of central-bank communication affect near-term exchange-rate volatility in emerging and developing economies.

Central Bank Information Effects.

With Cory Baird, Jonathan Benchimol, Vira Vyshnevska, and Wook Sohn. Studies how central-bank information disclosure shapes the domestic transmission of global financial shocks.

Monetary Policy Statement Database.

Built a reproducible cross-country database of **6,693 monetary-policy statements from 51 central banks**, combining automated collection, NLP, econometrics, and LLM-based analysis. Project
